YOUR PARTNER IN PROMOTIONAL BOTTLES

Can anyone say they have never seen a Tacx bottle? Probably not. Based in the Netherlands we are an industry leading specialist, producing, and printing bottles for over 25 years. Renowned for outstanding high quality imprints, client relations and fast lead times. The collection is divided into the categories Eco, Lifestyle and Sport. Quite simply, there is a bottle with a message suitable for every occasion.

Moreover, we are consciously in line with today's demand: we are not only increasingly aware of a healthy lifestyle, but we also focus on environmentally friendly products. The bottles are produced in an ethical manner under controlled conditions. For the development of our products, we are constantly searching for new raw materials that are greener, cleaner and are as environmentally friendly as possible. In Addition, to keep quality at a high level we continuously test, measure, and report all processes in our Sedex certified factory and ISO certified printing facility.

This might all sound very technical, but our goal is to make a positive contribution to the world with a sustainable product at a competitive price.

SPORT BOTTLES

Used by millions to hydrate and quench thirst

TACX SPORTS BOTTLE, THE ULTIMATE AFFORDABLE PROMOTIONAL EYE-CATCHER

Although we are all busier than ever, we all need to try to pursue a healthy lifestyle. Many Corporates promote this vigorously, after all a healthy team is a motivated team. You increasingly see that we are all encouraged to lead an active lifestyle; ride your bike to the office, participate in sports and basically do any kind of physical activities to improve your status of being in good health. A high quality branded Tacx sports bottle fits into the lifestyle perfectly. It's not only a functional, fun, and reusable product to have, but also protects the environment from single use plastic.

DAIYA TRITAN, THE CRYSTAL-CLEAR SPORTS BOTTLE WITH A LOW ENVIRONMENTAL IMPACT

Daiya Tritan is made from a durable and robust material, guaranteeing a long lifespan. This not only leads to a decrease in new products but reduces the environmental impact and waste.

Its special features include a large fill opening and a soft nozzle for fast and convenient hydration. The large print area accommodates a full-color CYMK print, allowing for vibrant customization. Not only is Daiya Tritan suitable for both hot and cold beverages, but it also offers benefits such as odor and flavor neutrality. Additionally, the material is stain-resistant, ensuring a pristine appearance over time.

Daiya Tritan represents a new era of high-end promotional bottles, combining style and functionality to elevate your brand.

ECO BOTTLES

Biobased made from sugarcane or biodegradable

POSITIVE CONTRIBUTION TO THE ENVIRONMENT

At Tacx, we believe in sustainability and reducing single-use plastics. Our bottles are crafted from high-quality raw materials, ensuring durability for years to come. By choosing Tacx, you're joining us in the fight against single-use plastics. But it doesn't stop there. In the unlikely event that you no longer need your bottle, rest assured knowing it can be 100% recycled. For those who want to go the extra mile, we offer "nature-friendly" options. Choose our biobased polyethylene made from sugarcane or our biodegradable polyethylene and make an even greater contribution to the environment.

Check out the range

100% Biobased made from sugarcane

This bottle is made of 100% biobased material from sugarcane. From the residual sugarcane material, we process polyethylene that is used for our bottles. This process is much cleaner than the conventional methods and has a nice added benefit: as the sugarcane grows, it removes CO2 from the air.

Biodegradable

This bottle is made of polyethylene with a bio-batch additive. This additive changes the molecular structure of the bottle. It has no effect on the use of the bottle until it reaches a landfill. At the correct temperature, the biobatch activates and the bottle decomposes into water, humus, and gas. The whole process takes about one to five years.

Fuse

LIFESTYLE BOTTLES

Elegant bottle with fruit fusion option

THE PERFECT WAY TO ADD FLAVOUR
AND VITAMINS TO YOUR WATER

We all know how important it is to stay hydrated, but sometimes plain water can be a bit boring. That’s where Fuse comes in. This sophisticated lifestyle bottle by Tacx allows you to infuse your water with delicious fruit flavors. Simply insert the optional (surcharge) fruit fusion stick into the cap, thread the fruit onto the stick and let the natural flavors infuse into your water. It’s a simple and refreshing way to add a touch of excitement to your hydration routine. Fuse offers a stylish solution for those looking to elevate their water-drinking experience.

StarLight bottle crate

Suitable for transporting up to 8 Shiva bottles of 500ml or 750ml and Daiya 550 ml.

Available in black. Pantone match available from 500 pcs.

TECH INFO

File specifications

- Adobe Illustrator 8.0 or higher (eps or vector ai file)
- Adobe Photoshop 5.0 or higher (or Adobe in-Design)

Fonts

- Mac user: please put the letter type in outline and send us the Fonts
- PC user: always change letters into outline

Print area

- Bidon 450ml: 195 x 140 mm
- Bidon 500ml: 235,5 x 100 mm
- Bidon 750ml: 235,5 x 100 mm & 235,5 x 29 mm (upper print area)

Distance between upper and lower part of imprint of the 750ml bottle is 95 mm (heart to heart print).

All-round printing

With an all-round print the beginning and end of the print area will come together at the back causing a blemish line. This must be accepted. As an alternative you can choose a 5mm opening.

Top print area 750ml bottles

When printing on the upper part of the 750ml bottle, the top print is considered additional printing colors. So, 2 colors above and 2 below means a total of 4 printing colors.

Full colour process print: CMYK

It could be, that part of the design has to be made up in CMYK and an additional spot colour. For example, text with a specific pantone colour. Therefore, to ensure your calculations are correct, please always send us the artwork to check the number of print colours required.

Silk screen prints

For each print colour we make an individual screen. We can print up to 12 colours. Our state of the art printing machine prints 6 colours in one production run.

Printing full colour

When printing a multiple colour design, where the colours meet a 0,5 mm tolerance in closure must be accepted. When printing full colour process CMYK, the end result is mat, pixelated and can deviate from the visual proof. Our raster size is 34 dpi.

Printing on coloured bottles

To print a pantone colour onto a coloured bottle, it's necessary to print a white underlay first. No white underlay is required for grey tints, gold, silver and white. In some cases an outline is visible and has to be accepted. The white underlay is calculated as one extra print colour and one extra screen. If white is already part of the design, there is no extra white underlay required. If in doubt, please contact us for information.

Dark bottles + Top of Shanti cap

Dark bottles and the Shanti caps are unfortunately very sensitive to scratches and scuff marks. This must be accepted.
